Education

Universidade Paulista

Bachelor of Computer Science, Computer Science · (2017 - 2020)

ETEC - Escola Técnica Estadual de São Paulo

Computer Technician with Emphasis on Programming · (2015 - 2016)

Summary

Frontend Engineer, with participation in more than 80 national and international projects, including UBER, Santander Bank, Grupo Boticário (Boticário, quem disse berenice, Eudora and The Beauty Box), Mambo, Sony, Ri Happy, Motorola, Correios, Shopstar.pe, among others.

Working with technologies such as Javascript, React Hooks, Redux, Flutter, Vue.js. TDD testing methodologies, with Jest.js or similar. Clean Architecture, along with development concepts such as SOLID. In addition to experiences with CI/CD.

Experience

F1rst Digital Services

Senior Frontend Developer

August 2023 - Present (1 year 7 months)
São Paulo, Brazil

Tools and technologies: React, Flutter, Vue, SOLID, Clean architecture.

At F1rst, Santander's technology arm, I serve as an essential part of the development team within Santander's fintech, Empréstimo Sim. My role covers a broad range of responsibilities, from technical discussions to carefully analyzing product-related decisions, where I consistently assess and suggest alternatives. In coding, I primarily work with hybrid tools like Flutter and Ionic, which enable code transpilation across multiple devices, ensuring a unified experience. My focus is on implementing best practices and developing robust architectures, ensuring the quality and scalability of our solutions.

MJV Technology & Innovation

Frontend Developer

January 2021 - July 2023 (2 years 7 months)

São Paulo, Brazil (Remote)

Tools and Technologies: React, Flutter, Vue.

MJV is a consulting firm where, from the beginning of my journey, I worked as a Senior Software Engineer, providing services for Bank Santander's fintech, Empréstimo Sim. I consistently gave my best, becoming an essential part of the company's daily operations, with a strong focus on the quality of deliverables. This commitment to excellence yielded results: at the end of my journey with MJV, I was invited to join the Santander team.

Pagtel

Frontend Developer

June 2019 - January 2021 (1 year 8 months)

Alphaville, São Paulo, Brazil,

Tools and Technologies: Development of interface with payment interactions, JavaScript, React,(Hooks, Redux and others), Jest, TDD, API Restful.

Pagtel is a company specializing in payment solutions. My journey there began as a mid-level frontend engineer, during a period when the company worked with major clients but operated with a lean team. This required me to take on multiple roles: from supporting client discussions about product development to diving deep into building complex code. This experience was highly enriching and offered me great opportunities, including delivering a complete project for the global company Uber. For this project, I prioritized quality, a robust architecture, and unit testing, ensuring a high-standard delivery.

CoreBiz

3 years 1 month

Frontend Developer

June 2017 - June 2019 (2 years 1 month)

Alphaville, São Paulo, Brazil,

Tools and technologies: Development and analysis of e-commerce, HTML, CSS, JavaScript, Jquery, VUE, React, VTEX Development, Google Tag Manager, Squad Methodology, Agile Processes.

As time went by at Corebiz, I evolved and was promoted to mid-level frontend developer, which brought new responsibilities that I was fully prepared to take on. Among my tasks, I took on international projects, such as Shopstar, a Peruvian e-commerce platform that I developed from scratch. This experience included a trip to Peru, where I provided in-person training for the developer responsible for maintaining the project.

Junior Frontend developer

June 2016 - June 2017 (1 year 1 month)

Alphaville, São Paulo, Brazil,

Tools and Technologies: Ecommerce Ecosystem, HTML, CSS, JavaScript , Jquery, VTEX Development, Built-in PHP tools.

Corebiz was a significant learning experience for me; it was truly where I began my career as a junior developer, at a time when the company had only 15 employees. I gave my absolute best and grew tremendously, both professionally and personally. I had the opportunity to work with major clients such as Sony and Motorola, along with more than 60 other clients. Being at the start of my career, I dedicated myself to learning everything I could from my colleagues, eventually becoming an essential part of the team. This dedication was recognized with an internal award as the Inspirational Professional of the Year in 2017. By the time I left, the company had grown to over 200 employees and expanded to three offices worldwide.

Pfizer Apprentice

May 2013 - April 2014 (1 year)

Itapevi, São Paulo, Brazil,

It was a simple but very impactful experience. When I started at Pfizer at just 15 years old, I had to overcome the age barrier to handle the company's internal and external correspondence process. This opportunity gave me a strong sense of responsibility and proactivity.
